4.12.2 The final examination is based on the weighted average of the grades obtained for all examinations that form part of the final examination, with the exception of the examinations for which an exemption was granted or examinations for which the student only obtained a proof of attendance. Components completed from other programmes, including components followed abroad, have to be approved by the Board of Examiners.

4.12.3 The weighted average of all grades is determined by multiplying the number of credits (EC) for each component by the grade awarded for this component, adding these together, and then dividing the result by the number of credits earned.

4.12.4 Without prejudice to the provisions of 4.12.6 and 4.12.7, the degree certificate and the diploma supplement includes the 'cum laude' classification if the following conditions (applicable to both full-time tuition and part-time tuition) are met:

- the weighted average for all components is 8.0 or higher.
- the grade for the Master's thesis is 8.0 or higher.
- the Master's final examination was passed within the nominal duration of study plus one year.

4.12.5 Without prejudice to the provisions of 4.12.6 and 4.12.7, the degree certificate and the diploma supplement includes the 'summa cum laude' classification if the following conditions (applicable to both full-time tuition and part-time tuition) are met:

- the weighted average for all components is 9.0 or higher.
- the grade for the Master's thesis is 9.0 or higher.
- the Master's final examination was passed within the nominal duration of study.

4.12.6 The Board of Examiners may also decide to award a distinction in other, exceptional cases, on the condition that the weighted average grade does not differ by more than 0.5 from the grades stipulated in the fourth and fifth paragraphs above. This may involve such considerations as the student's development throughout his or her study programme, any exceptional performances on the part of the student in completing the thesis and any other relevant exceptional circumstances.

4.12.7 If a student has been subject to a disciplinary measure as a result of irregularity, fraud or plagiarism, as set out in the Rules and Regulations, (s)he is not awarded a distinction, unless the Board of Examiners decides otherwise.

# Appendix A – Master’s Thesis Regulations

## Article 1. General terms

The thesis is a written report of research which the student has carried out under supervision by a lecturer but with a high degree of independence. The thesis must also give insight in the student’s ability to:

- a. independently formulate a research question which displays insight into the methodological principles, central issues and state of the art of his or her field of research;
- b. independently formulate a realistic research plan which fulfills the criteria set in the relevant field of research;
- c. critically and analytically report on existing academic debates and propose creative solutions based on secondary literature;
- d. apply the more complex concepts/methods of his or her field to a corpus of primary source material (whether existing or collected during the student’s own research);
- e. formulate ideas clearly and correctly.

In principle, a Research Master’s thesis must be of sufficient quality (possibly following some modifications) to be published in an academic journal in the relevant field.

## Article 2. Scope

The master’s thesis has a study load of at least 20 credits. The research master’s thesis has a study load of 30 credits. A thesis seminar or tutorial can be part of the aforementioned credits. The scope of the thesis generally corresponds to a maximum of 1000 words per credit, including notes, bibliography and appendices. If the Programme wishes to deviate from this, this information is included in the Prospectus.

## Article 3. Double thesis

For the conditions that apply to write a combined thesis for multiple master’s programmes see article 4.11 of the Rules and Regulations set by the Board of Examiners.

## Article 4. Language

The thesis is written in the language of instruction of the programme, as determined in the Course and Examination Regulations (article 2.8 of the programme-specific section). The Examination Board can only in advance permit the student to write the thesis in another language than the language of instruction.

## Article 5. Supervision

1. The Programme is responsible in the early stages of the proceedings for putting the student in contact with a lecturer who will supervise his or her thesis. This should preferably take place upon commencement of the study programme. This lecturer (the supervisor) must be an expert in the field of research covering the thesis topic.
2. In consultation with the supervisor, the student formulates a thesis plan. If deemed necessary by the programme, the plan can be brought to the attention of the Examination Board.
3. The Board of Examiners appoints the supervisor as first reader/reviewer of the master’s thesis. Details about the procedure for appointing the first reader/reviewer are available in the course description of the master’s thesis in the Prospectus for each Programme.
4. At the very minimum, the following communications must take place between student and supervisor:
  - a. an introductory discussion concerning the choice and scope of the thesis topic, the research question, the literature, the source materials, the general approach, consultation with appropriate experts, etc.;
  - b. a discussion of the working plan for the thesis;
  - c. a discussion of one or more intermediate stages of the thesis;
  - d. at the request of the student: a discussion of the final version of the thesis, in which the evaluation of the thesis is explained.
5. If, in the course of supervision, problems should occur between the student and his or her supervisor(s), the Board of Examiners – having heard the parties – will decide upon the continuation of the supervision process.

## **Article 6. Assessment**

1. The student submits the final version of the thesis digitally via Turnitin in the Brightspace module of the thesis of the relevant Programme. The student informs the supervisor (first reader/reviewer) and, if already assigned, the second reader/reviewer about the upload of the thesis. If the supervisor and/or second reader ask for a hard copy of the thesis, the student is required to submit a hard copy of the thesis to the supervisor and/or second reader.
2. In the student's second semester (master) and fourth semester (research master) the Programme Board, without prejudice to the rights of the Board of Examiners, offers two deadlines for submission of the thesis. So that, in case of an insufficient grade, the student is enabled to resit the thesis within the academic year. When setting the deadline for the resit in Spring semester, the Programme has to take into account the date of certification in September. In addition, the student can graduate every month from September up to and including June. Consequently, the student is allowed to submit the thesis within this time frame.
3. A thesis must be graded within four weeks. Between 1 June and 31 August, this period is extended to a maximum of six weeks.
4. The thesis is assessed on at least the following aspects:
  - a. the originality of the research question and the manner in which it has been out into practice;
  - b. the critical analysis of secondary literature;
  - c. the critical analysis of source materials;
  - d. language use, structure and style;
  - e. the degree of independence displayed during the research and supervision process.
5. After the first reader/reviewer has determined that the final version of the thesis is ready for assessment, the Board of Examiners appoints a second reader/reviewer. Should the nature or contents of the thesis make such a step desirable, a second reviewer can be appointed from experts outside the Programme. The second reviewer will assess the final version of the thesis. He/she has not been involved in the supervision.
6. The second reviewer will give an assessment of the thesis, based on the assessment criteria established for the master's thesis. The final grade of the thesis is determined by the first reviewer in consultation with the second reviewer, and is substantiated on the basis of the assessment criteria indicated on the appropriate assessment form.
7. If the first and second reviewer disagree on the final grade or if the assessment of the first and second reviewer is two points or more apart, the Board of Examiners will appoint a third examiner.
8. The final grade of the thesis will not be registered unless the student has uploaded a copy of the thesis into the Student Repository.
9. If the thesis has been assessed with an insufficient final grade, the thesis should not be uploaded in the Student Repository. In this case, the insufficient grade should be registered in the thesis assessment system/uSis, so it is clear that the thesis must be retaken.

## **Article 7. Appeals**

The student can appeal against the assessment of his or her thesis to the Examinations Appeal Board. For more information, please contact the Administrative Secretary of the Board of Examiners and/or the Coordinator of Studies.

## **Article 8. Fraud, plagiarism, copyright<sup>15</sup>**

1. Fraud is defined as any activity or omission carried out by a student aimed at completely or partially hindering a correct assessment of the student's knowledge, understanding and skills, including at least the following:
  - a. wholly or partly copying texts / constructions from other authors, including fellow students, without indicating this with quotation marks and without mentioning the source (plagiarism);
  - b. having a text, or part of a text, composed by another person or other persons;
  - c. inventing research data;
  - d. using his or her own work without a reference (self-plagiarism).

---

<sup>15</sup> See also chapter 6 'Plagiarism, irregularity, and fraud' of [the rules and regulations Board of Examiners](#).

2. Any instance of fraud (and the suspicion of fraud) will be reported to the Board of Examiners by the reader who discovers this. The other reader will also be informed. For the sanctions that can be imposed by the Board of Examiners, please refer to article 6.5 of the Rules and Regulations of the Board of Examiners.
3. Copyright of the thesis rests with the student.
